Mary, Morning Star & Mary, Mystical Rose

To the north and south of the Mary, Gate of Heaven Mausoleum are two cremation gardens. The one to the south is named "Mary, Morning Star" borders Section K of the cemetery. The one to the north is named "Mary, Mystical Rose" and borders the fence along Holy Cross Drive and campus.

Each garden has three columbaria—one semicircular, one round, and one rectangle. Each garden also has four interment options within the landscaping itself. These options are in-ground niches, cremorial boulders, cremorial benches, and cremorial pillars. Descriptions of each option and sample pictures are listed below.

In-Ground Niches

In-ground niches allow for the burial of two urns within a single chamber. These niches are scattered throughout the beds. Color options for the granite marker are grey or blue in Mary, Morning Star or grey and green in Mary, Mystical Rose. The markers are engraved with the memorial information.

Cremorial Boulders

Cremorial Boulders are for the inurnment of two sets of cremated remains within cores that have been hollowed out of the boulder. A bronze disk caps each set of remains with the memorial information. They are placed within the raised beds as a natural feature in the landscaping.

Cremorial Benches

Cremorial Benches are for the inurnment of up to four sets of cremated remains within cores that have been hollowed out in the upright portion of the bench. Engraving can be placed on the face of the seat as well as the front and/or back of the upright. They are placed along the walking paths of the gardens.

Cremorial Pillars

Cremorial Pillars are for the inurnment of up to four sets of cremated remains within the core of the structure. Engraving can be placed on any of the four sides of the pillar. The bronze plaque may display the family name. The four pillars are placed at the western entrance of the Mary, Gate of Heaven Mausoleum.
